

## **MILESTONE AWARDS FOR REDHALL'S NUCLEAR OPERATIONS**

Redhall Group plc, the specialist engineering support services group, is pleased to announce that two of its specialist nuclear engineering support operations, Jordan Nuclear and Steels Engineering Services have both received specialist contractor awards from their major Clients.

Jordan Nuclear has fought off tough competition to recently be awarded the Sellafield Resident Engineer's Safety Award for 2008. Resident Engineer's Safety Inspections are carried out by Sellafield on a 12 monthly rolling basis on all site based companies.

Steels Engineering Services has been named as Contractor of the Year at AWE Aldermaston for 2007/08. Again this award was won against stiff competition from some of the largest contractors in the UK, the award is based on a personal recommendation of the Head of Construction at AWE, and follows a review of a number of critical areas including personal visits to site by the Head of Construction AWE. In both cases the inspections look at the safety culture of the company including visible leadership, behavioural safety and shared learning from experience.

Simon Foster deputy CEO Redhall Group plc said "these awards reflect the considerable effort and investment in operations and HSE made by both the companies and the Group. They are a reflection of the excellent performance and continual improvement achieved by all of the workforce. We are particularly delighted as this is the first time since these awards have been presented, that a single PLC group has held both these key AWE and Sellafield awards".

*Redhall is a leading niche engineering support services group operating in the nuclear, oil and gas, petrochemical, defence and security sectors. For further information please contact Simon Foster, Deputy Chief Executive, Redhall Group plc, 1 Red Hall Court, Wakefield, WF1 2UN. Tel: 01924 385386.*
